acrilan
Water Experience

ACRILAN is the first Greek Company that manufactured acrylic bathtubs, in 1982. The entire production procedure was completed at our own factory premises (40,000m² and 6,000m²) in Chalkidon, Thessaloniki, Greece, which has been a landmark for company operations to date. From its very early days as a pioneer in Greece, ACRILAN has been steadily growing and enjoying its customers' satisfaction; this has ranked the company among top manufacturers and sellers in the sector of Sanitary Appliances. Since its establishment, ACRILAN has stood out thanks to its unique philosophy, which is reflected on its product design, as well as its consistent cost/benefit ratio and the quality offered to its clientèle. At ACRILAN, we dedicate our entire expertise to transform water into a means inducing relaxation and well-being. ACRILAN manufactures its products using cast acrylic, a material with anti-bacterial properties, which also complies with all European Union specifications & standards and holds all necessary certification.

SERVICES

SUPPORT

We support our customers using the experience and deep knowledge of our materials, so that they may successfully materialise their ideas.

TOP QUALITY MATERIALS

Cooperating with top associates warrants that appropriate raw materials and components are to be used for every project.

ADAPTABILITY

We can adapt our models so that they meet customers' needs, at minimal cost, without compromising their excellent quality. ACRILAN sees to it that the range of its products keeps up with market trends, to ensure that its customers will receive a top quality product responding to their high expectations.

AFTER-SALES SERVICE

We support our clientèle after product sales using the expertise at our disposal, to ensure that the high quality level of our products is maintained. At ACRILAN we deeply believe that we are responsible for everyone who uses our products and it is our duty to respond to their expectations through time.

Our most important ingredients are creativity and the love of everyone at ACRILAN for our work. Our company is always at the service of our clients through its specialised staff members. At ACRILAN we effectively share the coproratet vision and mission reflected in achieving the high targets we set through systematically consistent work.

The right people hold the right posts in all company departments to ensure excellent service to our associates.

MAXXIMUM DURABILITY

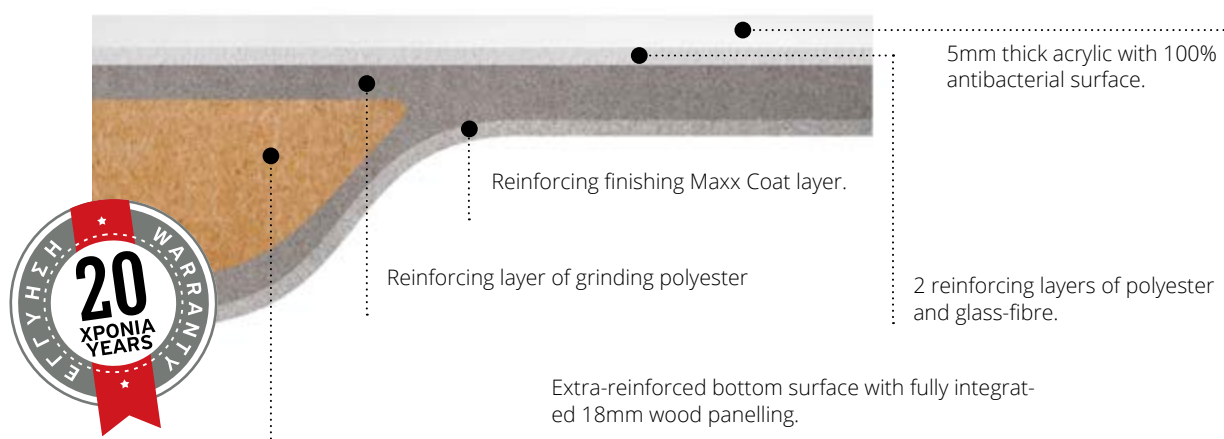

acrilan
Water Experience

ACRILAN MAXXCOAT®

ACRILAN, a pioneer manufacturer of acrylic bath tubs, combines scientific knowledge with year-long experience and modern technology - it stands out for its consistent reliability and the high quality of its products. This incessant effort has enabled us to present to you the new technological enhancement of Maxx Coat, which warrants:

- absolute rigidity
- robustness
- high resilience
- maximum heat insulation
- enhanced sound insulation
- longer heat retention time
- long-lasting glow of the acrylic material
- long-term stability
- humidity resistance
- impermeability

Available for extra reinforcement to specific models

VELOUR MATTE

The refined, velvety matt texture provides a luxurious look and a feel of natural stone, accompanied with all the advantages and high performance properties of acrylic.

The range of colours available make Velour ideal for bath tubs, shower or SPA units in modern bathrooms, while adding value to any product because of the competitive advantages of acrylic.

This material indisputably attracts the interest of interior decoration experts, such as interior designers and architects and, of course, of consumers, because of its trendy look; it also maintains all the advantages offered by cellular cast acrylic.

This innovative material stands out for its elegance; it creates a pioneering class of products and fully meets the needs of end consumers with its wide range of matt colour shade options.

ROUND BATHTUB

Acrilan Company presents an innovative idea for the perimeter of round bathtubs: Handwoven sisal coating

Sisal rope is made of sisal grass (*Agave sisalana*).

The plant fibres are strong and durable; they are sheared and processed so as to be convenient for use.

Sisal is traditionally used as raw material for rope manufacturing. At Acrilan it is woven on a base by hand and then processed with special wax coating to render it impermeable and oil-resistant; this ensures it repels water and oil stains.

Furthermore, sisal is resistant to humidity, mould and micro-organisms, ensuring a longer life cycle.

PNEUMATIC No 2

Pneumatic Hydro-massage No 2

1,580€

- 1.5 HP pump
- water level sensor
- 8 adjustable slim water-air CLENDAs jets; ø 65mm; combination of two sets
- 1 air button extra slim that can be placed on a vertical side
- 2 air control extra slim panels that can be placed on a vertical side
- extra slim aspiration system with safety valve
- disinfection tablet cleaning system
- pump drainage system connected to CRS valve
- connection and safety panel
- vibration-resistant safety system
- IP X 5 protection
- Automatic thermal switch; stops every 20sec
- perimeter base
- wall corner supports
- automatic thermal safety switch
- Automatic waste disposal CRS valve connected to the pump for thorough drainage
- disinfection tablets

Available with 6 CLENDAs jets and 6 micro jets in the same series at no extra charge.

The following jets are installed with Hydromassage No 2 systems and all electronic systems.

CLENDAs SLIM CENTRO

Highly efficient air-water mixing jet with adjustable direction control; removable cover, ø 65mm.

CLENDAs SLIM SWIRL

Rotating hydrotherapy jets designed to provide pulse massage; removable cover, ø 65mm.

MICRO JET

Mini Jets designed to provide intense hydro-massage to back and shoulders.

AIR-MASSAGE

Basic

740€

- 1050w blower (750w blower & 300w air-heater)
- 12-16 jet air-massage, provided bathtub size is suitable
- 1 extra slim air button that can be placed on a vertical side
- connection and safety panel
- anti-vibration pump blower system
- perimeter base
- wall-mounted corner supports

The air-massage system can be installed independently or in combination with one of the hydro-massage pneumatic systems

Plus

980€

- 1100w blower (800w blower & 300w air heater)
- 16-24 jet air-massage
- 1 extra slim air button that can be placed on a vertical side
- anti-vibration pump system
- perimeter base
- wall corner supports

AROMATHERAPY SYSTEM

Aromatherapy system

120€

It includes a set of four net sachets filled with aromatherapy balls.
 Long-lasting use
 Scents: Relax (Lavender), Energy (Eucalyptus), Calm (Chamomile), Romantic (Rose, Ylang Ylang).
 It can only be installed with an air-massage system.

..... Microsilk HYDROTHERAPY

Microsilk

1,900€

- on/off :LED-lit control panel
- Stainless 230v, 50Hz, oxygen pump
- output jet
- aspiration
- water level sensor
- connection & safety panel
- supporting perimeter base
- anti-vibration pump system
- Economy pop-up (crs) valve

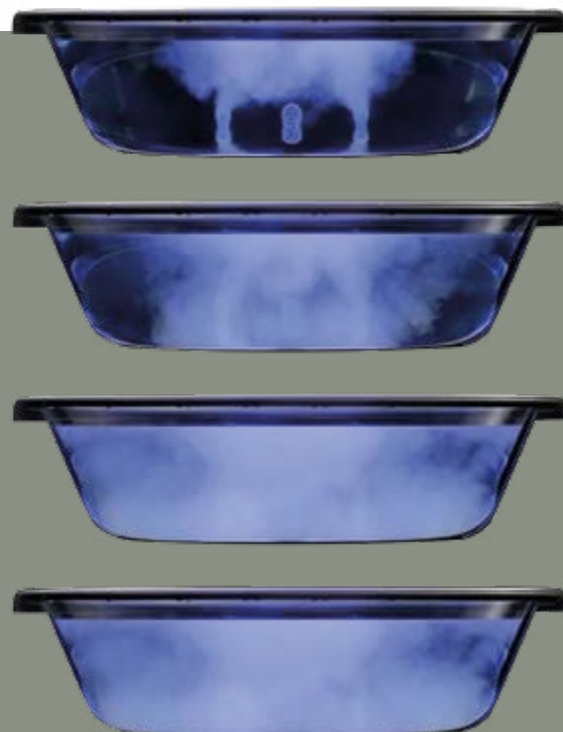

.....

The Microsilk system channels millions of oxygen micro-bubbles into the water, creating a floating milky cloud.

It can be installed as an independent system or combined with a Hydro-massage & Air-massage system, if the bathtub size is suitable.

ADVANTAGES

- Soft silky feel
- High oxygen levels
- Improved detoxifying& hydrating action
- A truly relaxing and calming experience

TOUCH HYDRO

Touch hydro	1,880€

It includes:

- LED chromotherapy with 11 colour changes
- automatic colour change
- digital control panel
- connection and safety panel

Disinfection Systems

With chlorine tablets **€120**

- Neutral pH suitable for all water hardness levels.
- Available in 50 chlorine tablet packaging.
- Incorporated disinfection for pneumatic hydro-massage No 2.
- Applicable for pneumatic hydro-massage systems.

With dose-dispensing pump containing liquid chlorine **440€**

- Suitable for the sanitation necessary for the hydro-massage pipe system.
- Disinfection is incorporated in the electronic hydro-massage systems.
- Applicable in pneumatic hydro-massage systems with digital control panel, water level sensor and operation display.
- 1L disinfecting fluid is offered free of charge

With bromide **220€**
 1Kg Bromide Tablets **48€**

- Disinfection system based on stable bromide dose. Bromide disinfection does not alter water properties nor does it irritate the skin and eyes.
- Applicable for pneumatic hydro-massage systems.

Containing ozone **320€**

- The ozone-generator disinfection system is a natural water and skin cleaning system; it transforms oxygen into ozone and enhances its beneficial properties, without affecting pH levels.
- It is exceptionally friendly to the environment and effective in eradicating harmful micro-organisms.
- Applicable for all hydro-massage systems.

Water temperature maintenance system

Heater	1.5kW	3kW
LED on/off	€660	680€

1.5kW or 3kW heater, depending on bathtub capacity and size. Applicable for all hydro-massage systems.

Radio

Radio set **320€**

Included: two chrome speakers, electronic control panel and connection box. It can only be installed in a bathtub with a panel.

acriJan

CLEANING & DISINFECTION

MORE THAN JUST CLEAN

DETERGEN

Fluid cleaner for acrylic surfaces
500ml

28€

Innovative non-abrasive disinfecting cleaning product for acrylic bath-tub surfaces.

Its special gel formula acts in depth, removes organic residues and mineral deposits and maintains the glowing, bright, acrylic surface.

IDRONET

Disinfecting fluid for hydro-massage system cleaning
500ml

32€

Cleaning and disinfecting product for hydro-massage systems. It acts inside the pipes, pumps and hydroelectric devices against fungi, bacteria and grease. No foam.

Applicable for all hydro-massage systems.

CLEAN UP

Velour cleaning fluid
500ml

28€

Neutral cleaning product with disinfecting action for sensitive surfaces. Thanks to its special formula and neutral pH, its mild action does not affect even the most sensitive surfaces; effective cleaning action against grease. The ammonia salts contained in Clean Up offer strong disinfecting and microbicidal action to make surfaces perfectly clean and sterile.

STEAM GENERATOR CLEANING GRANULES

Steam generator cleaning granules
250gr

16€

F.U. E330 Citric acid to prevent mineral deposit formation in the steam generator and ensure proper operation.

DT 33

Glass detergent **26€**
500ml

Protective cleaning product against mineral deposits and water drop marks. It creates a layer that protects glass from mineral deposits. Shower cabin cleaning becomes easier, faster and less frequent.

IDROSANIT

Disinfecting fluid for electronic hydro-massage systems **28€**
1L

Disinfectant, anti-bacterial product; cleaning action for the water contained in the bathtub. Turns the water azure blue. Ideal for hydro-massage system maintenance. It acts inside pipes, pumps and hydro-electric components of hydro-massage systems. It effectively prevents the growth of fungi and bacteria. After its use, the same water can be safely re-used. Suitable for electronic hydro-massage systems containing dose-disposing container or for SPAs.

DF 50

Mineral deposit remover **32€**
500ml

Ultra-condensed mineral deposit removal product. Removes mineral deposits fast and effectively; no surface abrasion or erosion. Ideal for acrylic surface maintenance. It can be diluted in water (1/4) thanks to its highly condensed formula. Ideal for acrylic surface maintenance (ceiling shower heads, hand-held showers - hydro-massage water mixers and jets).

DISINFECTION TABLETS

Disinfection tablets **28€**
50 pieces

Chlorine-based detergent; prevents bacterial and fungal growth. Recommended for hydro-massage systems No 2.

THERMOSTATIC TECHNOLOGY

Energy is spent to get from cold to hot. The ALPI thermostatic mixer achieves the desirable temperature as fast as possible, keeping energy consumption to a minimum.

- Ceramic disc water management system.
- Filtering system with built-in valves
- Thermostatic cartridge
- Galvanised metal box
- Galvanised protective lid
- Chrome plate

WALL MOUNTING SOLUTIONS

The thermostatic water mixer is the basis of the entire system, since it maintains the diverter temperature stable, thanks to its capacity to provide direct water flow to 1-5 different outputs.

The ALPI wall mounting system facilitates the installation of the thermostatic water mixer onto the wall before bathroom panelling is placed. This allows precise placement to calculate depth. The system protects the water mixer from mineral deposits and facilitates access for maintenance or for cartridge and filter replacement purposes.

Water captured by the charm of steel

STAINLESS DRAINS

All products are made of AISI 304 stainless steel, which makes them exceptionally resistant to erosion and wear. They are also easy to maintain with excellent sanitation performance. All these features allow their guarantee period to be extended to 20 years.

made in Italy

TOP VALVE FERPLAST PATENT

LINEARDRAIN Line is a perfect combination of effectiveness and originality. By replacing the shower unit base, LINEARDRAIN can meet all aesthetic and practical aspects when creating a modern bathroom. The line is manufactured without soldering using a single AISI 304 stainless sheet to warrant excellent durability.

The valve is made of two parts: a rigid body made of a thermostatic polymer and a silicone valve, specially designed to give in to gravity during normal water flow. While it is 'shut-off', it remains closed, preventing strong unpleasant smells from escaping when emptying. Under reverse pressure, due to any potential water return, it seals to prevent overflow.

.....

ADVANTAGES

- Fast and easy installation and replacement
- Easy maintenance and cleaning
- Resistance to high temperatures and chemicals
- Prevents unpleasant smells, insect entrance and any water return.

INTILE
REVERSIBLE DRAIN 90x10 & 60x10cm

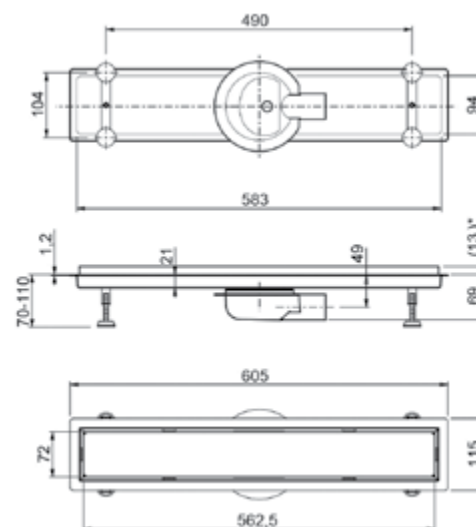

Intile 0.90 x 0.10m

An abstract composition of overlapping geometric planes. A large white triangular shape is positioned at the top left, meeting a dark grey textured triangular shape at the top right. Below these, a dark grey textured trapezoidal shape is on the left, and a dark grey textured rectangular shape is on the right. At the bottom, a white trapezoidal shape is visible. The word "SLIM" is centered in white, uppercase, sans-serif font.

SLIM

SLIM SHOWER UNITS

WALL PANELLING SYSTEMS

SCHEDPOL

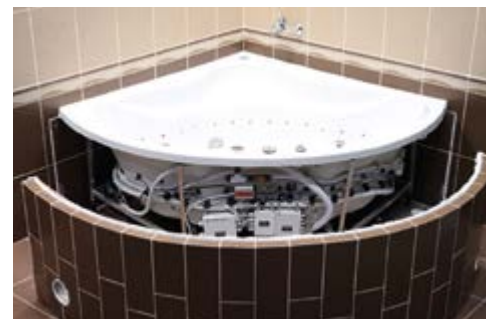

The Schedpol System allows easy, fast, and clean bathtub installation.

Simple and fast installation, high weight and pressure strength, immediate tile adhesion and low cost are some of the advantages of the system.

It provides:

- Thermal insulation
- Sound insulation
- Fungal resistance
- Long-term durability
- Humidity resistance

Material: Net-reinforced polystyrene with finishing mortar layer. Suitable for straight line, corner and asymmetrical bathtubs to replace construction.

Wall mounting / panelling system for 2.40x058m bathtub

136€

Packaging: Contains 3 pieces 80cm x 58cm.

Placed flush with the bathroom groove; space left to adhere small tiles/tesserae.

SC/1

Wall mounting / panelling system for 2.70 x 0.58m hydro-massage

176€

Packaging: Contains 3 pieces 90cm x 58cm & additional fitting corner for straight line bath tubs.

Removable material to allow full access.

Ceiling shower head made of INOX steel; dimensions: 48x63cm

With lighting and nebulising jet.

Thermostatic mixer on a stainless steel plate with hand-held shower head and on/off operation in the hammam mode. Dimensions: 62x10cm.

Professional steam generator with external steam diffuser and aromatherapy unit.

WELLNESS & SPA

With over 30 years of experience, ACRILAN keeps aiming at new innovative products that can improve daily life and offer moments of relaxation and wellness, transforming water into a means for well-being.

The renewed Spa range for exterior and interior use is manufactured in its entirety in Greece, implementing a procedure certified under ISO 9001 and observing European Standards EN14516 & EN12764. All spas are equipped with top quality American control systems by BALBOA water group. Our Spas are an ideal solution for those seeking high quality aesthetics and innovative technology at an affordable price.

We invite you to indulge yourself!

THE MATERIAL..... *Lucite*® SPA

At Acrilan all spas are manufactured using cast acrylic sheets by Lucite, the spa material par excellence. Soft, warm and pleasant to the touch, it is an ideal choice!

With their excellent colour stability, unaffected by ultraviolet radiation or temperature fluctuations and chemicals, Lucite acrylic sheets can be installed outdoors without any risk of wear. There are no pores in the material, which is also easy to clean. It is available in a wide range of colours and effects.

White, pearl-like or marble-like are some of the options available so that you may create your own personal spa.

OAK NATURE

THERMAL COVER THERMAL COVER

We manufacture our spa covers so as to offer the best possible heat insulation and to protect the spa from wear.

Our covers have an interior layer of expanded polystyrene and an external layer of imitation leather (poromeric material) resistant to ultraviolet (UV) radiation, salt and chlorine.

Imitation leather is also resistant to fungi and bacteria and slow-burning.

Our covers are easy to fold so as to facilitate transport and storage and equipped with handles and stabilisation straps.

They are available in white or grey colours.

WATER MAINTENANCE.....

In order to maintain a spa (small pool) in good condition, there are few, yet fundamental rules. Only a few hours after filling, although the water appears clean and translucent, a fast, progressive process of contamination starts, as the air, the bathers and the environment keep introducing dirt into the water, which provides nutrients for bacteria and algae, resulting in opaqueness and unpleasant odours.

This process is effectively tackled at two stages in a simple and quick manner. Initially, a filtering and recycling system removes surface sediments thanks to the recycling paper filter (cartridge), which has to be cleaned and replaced. At the second stage, products designed specifically to control and prevent bacterial and algal growth are used to ensure the water is suitable for use.

We recommend oxygen should be used for disinfection, and the OXI SPA SET kit contains everything necessary for the proper maintenance of water, whether it is used domestically or professionally.

The kit includes: Active oxygen tablets, pH fluid regulator, disinfectants against the 'green' surface film and opaque water (algaecide), pH tester, Spa wall cleaner and a dose dispenser for the tablets.

Lastly, all vacuum cleaners remove dirt and return the water clean through water aspiration. This is an ideal solution for cleaning the bottom of spas, particularly at difficult spots, without emptying the pool.

SPA KIT

The Maintenance and Disinfection Kit

180€

includes:

- pH/Br₂ Tester - O₂, oxygen pH meter
- OXINET 20, 20gr disinfecting tablets are suitable for disinfection without chlorine, using active oxygen.
- Alga Clean is a cleaning fluid to control and prevent the formation of the green film on the spa surface; 1L
- Idro pH corrects water acidity, 1L
- Foam Stop prevents foam formation on the spa surface, 500ml
- Deterbord disinfecting fluid acts against dirt and sediments, 750ml

IDRO SANIT

Liquid disinfectant for SPA Systems, 1L

28€

Disinfectant, anti-bacterial product; cleaning action for the water contained in the bathtub. Turns the water azure blue. Ideal for spa maintenance. It acts inside pipes, pumps and hydroelectric components of spas. It effectively prevents the growth of fungi and bacteria. After the product has been applied, the same water can be safely re-used. Suitable for SPAS

FILTER & SPA CLEAN

Filter cleaning fluid, 1L

38€

Suitable for filtering systems. Ideal for cleaning filters, while effectively preventing the formation of bacterial colonies or algal and mineral salt spots inside hydroelectric components.

Cleaning fluid, 500ml

34€

A cleaning product against spa mineral salts. It removes mineral salts and sediments from spa surfaces and prevents their formation.

VAC POMPA SPA

Vacuum cleaner

160€

Manual vacuum pump for cleaning the bottom of the spa. It absorbs water and returns it clean, holding dirt in its special filter.

AQUABROOM

Vacuum cleaner

240€

Automatic spa vacuum cleaner. It removes sand, sludge or even algae. It operates with 5 DCELL batteries (ON/OFF switch) offering longer than 3 hours of continuous operation. Manual use. Connecting to any telescopic pole.

CATFISH

Vacuum cleaner

380€

Rechargeable spa cleaning electric vacuum cleaner. Effective cleaning of sand, leaves, algae. Manual use It connects to any telescopic pole with a special 'micro-filter' bag to hold small particles removed. Easy to manoeuvre into corners. Rechargeable lithium batteries offering around 45 min of continuous operation.

..... LIFE BRUSH

Small brush

34€

Small brush, ideal for spas and hydro-massage facilities. Semi-circular design. Soft-hair brush.

..... LIFE WATERWAND

Filter cleaning tool

58€

Spa filter cleaning tool Simply connect to a water hose. 8 finger-like nozzles spray water under high pressure to ensure the filter surface is cleaned. It extends the life cycle of filters.

..... MAGNUM FILTER

Filter

46€

Paper cartridge; 2-piece set.
